

Integrated Software License Management Tools for Engineering Applications

License Asset Manager™ with Usage Monitoring Features and Capabilities

Installation and setup:

- Windows or Linux (Server, VM or cloud)
- Easy to install (< 1 hour)
- On-site implementation services (2 or 3 days)
- Intuitive User interface
- Autostart all Services
- On-line HELP with linked TOC
- Linux CentOS image vdi/vmdk complete install
- Single Sign-on compatible
- Active Directory integration

Asset/Inventory Management:

- Centralize, protect, and share information
- Contract/Document Management
- Contact Management
- Inventory by:
 - Vendor
 - License Type
 - Restriction
 - Responsible Person
 - Discipline
 - Renewal date
- Current License Inventory report with total License count by Tool
- Track license by
 - port@host
 - License file
- "FlexParser" used to view License File
- Import Template for Licenses, Vendors, Servers
- Auto Renewal Expiration Alert

Daemon Manager:

- Capture and store daemon information
- Deploy, start, stop Flex daemons
- Read, edit, reread License files
- Read, edit, reread Option files with Syntax check

Alerts (automatic):

- License Available
- Renewal Expiration Alert to "Responsible Person Only" option
- Long check-out
- Long check-out with Warning Letter
- Near Capacity alert
- At Capacity alert
- Daemon-down alert
- Expiration alert
- User-definable alert frequency
- Duplicate License Checkout alert
- Denials threshold
- License Expiration Alerts with "expired Licenses" option
- Renewal Expiration

Other:

- Heatmap (24x7 usage patterns)
- Dynamic "path" checking for Debug Logs
- MSC CAMPUS sub-feature reporting
- Token Sum reporting for sub-features
- Comprehensive Usage (short checkouts)
- CRON status lights
- Methodology "best practices" training
- Eastern time zone
- Superior Technical Support
- Direct access to developers
- "Change IP" script
- U.S. Veteran owned, small business

Licenses:

- "Borrowed"
- "Reserved"

License Types Supported:

- FlexLM/FlexNet
- LUM
- DSLS
- Reprise
- Sentinel (RMS, HASP and Zemax)
- Altium
- LM-X
- MathLM
- Windchill
- Atlassian
- Codemeter
- Wibu

Interfaces:

- Excel in / out
- Generic usage import
- JSON (Tableau)
- FNM data import

Database Management:

- Automatic database Backup
- Restore Backup
- Truncation and Archive
- DB reduction Procedure (remove 0's)
- Auto DB reduction

Custom Software:

- Ability to customize (NRE)*
- Custom node-locked monitoring agent

* Extra cost

"License Asset Manager" and "LAMUM" are trademark names of TeamEDA and are products solely of TeamEDA.

Integrated Software License Management Tools for Engineering Applications

License Asset Manager™ with Usage Monitoring Features and Capabilities

Graphs:

- Dynamic History Graph (display data points)
- .jpg images (copy/paste, email,...)
- Auto-scaling
- Denials Graph
- Group Usage graph
- Batch: All features by Tag - Graphs
- Multi-Graph Batch report/view (up to 8 graphs)
- Combined-feature' graph (same Feature across multiple license servers), selectable by Tag

Tables:

- Export to Excel
- Can be sorted (by column heading)
- Can be "filtered"
- Batch: All feature Detail by Tag - Tables
- Combined-feature' Table (shows usage by User across multiple license servers)

Easy to use Batch Reports:

- Weekly, monthly, quarterly - 7/30/90/180/365 days and YTD time periods
- Custom time periods
- Folder or e-mail delivery (multiple e-mail address)
- Expanded Active Directory fields for Batch exports
- "Test" Batch Report button
- All feature Detail by Tag - Tables

On Demand Reports:

- URL created report
- Favorite (Browser and "Favorites" Tab)
- User Dashboard

Usage Monitoring by

Tool / Feature / Tag:

- Variable CRON Interval
- CRON status lights
- Comprehensive User Activity
- All or only selected Features
- Realtime view of License file (features and expiration dates)
- History Graph by feature / tool / user
- Feature Name Aliasing (on-line or off-line)
- Combined-feature Table (shows usage by User across multiple license servers)
- Multiple-feature' report (multiple features, same port@host)
- Variable CRON Interval
- CRON status lights
- Comprehensive Averages Overview, M-F only
- History by User

Concurrency Reports:

- 24x7 (% at each level) M-F, 8-5
- Variable time period

Denials by:

- Heatmap
- Detail export to Excel
- Feature report
- Tag report
- User report
- DSLS denials report

"Zero-Usage" Reports:

- By single Tag
- All Tags
- Gas gauge view with option to show Zero use

Groups:

- Group Usage:
 - By Feature
 - By Group
- Groups from AD, Auto sync option
- History by Group
- Groups from:
 - Excel spreadsheet
 - Active Directory
- Group list import / export
- "Users not in any Group" report

Averages Reports:

- Total usage time
- Average checkout time
- Average number of users

Current Checkouts:

- Overview (color-coded)
- Queued Licenses in Current Overview
- Real-time "gas gauges"
- By User
- # times at "max. checkout"
- Restricted URL access to current license checkouts
- Detail by Tool/Feature
- Comprehensive Usage report (short checkouts)
- "Heatmap" (24x7 usage patterns)
- Dynamic "path" checking for Debug Logs
- LMREMOVE (Current Checkout Details)

Chargeback Reports:

- By User
- By Group
- Cost Field for allocation of cost in UM Charge back Reports
