

# Integrated Software License Management Tools for Engineering Applications

## Opportunities for Strategic Technology Partners

*Monitor the leading Engineering tools including CAD, CAE, EDA, PLM, Simulation, Analysis and many others.*

LAMUM offers customers a management tool for your engineering Licenses.

We help your customers track:

- License inventory
- Renewal dates
- Vendor Contacts and Contracts
- Monitor usage
- Track Denials
- Provide an objective way to create Chargeback reports.

We also Alert your Customers when they reach Capacity, if there are Long Checkouts, and will Alert them when an engineering software daemon is down.

They will get more out of your engineering software tools with our product. We also provide them an Alert of upcoming renewals.

**Use Case - Confirmed with Zemax**  
LAMUM from TeamEDA is now recommended by Zemax to monitor and manage license usage of Zemax products providing detailed usage information and insights.

*“Customers may wish to **monitor and report on how Zemax licenses are being utilized in their network, including maximum number of licenses used at any given time.**”*
